

Collaborative research, illustrated.

A shared space for curious minds to read, analyze, write, and build knowledge with AI — grounded in your sources.

- Papers & PDFs
- Collaborate
- AI, grounded in sources
- Analyze & visualize

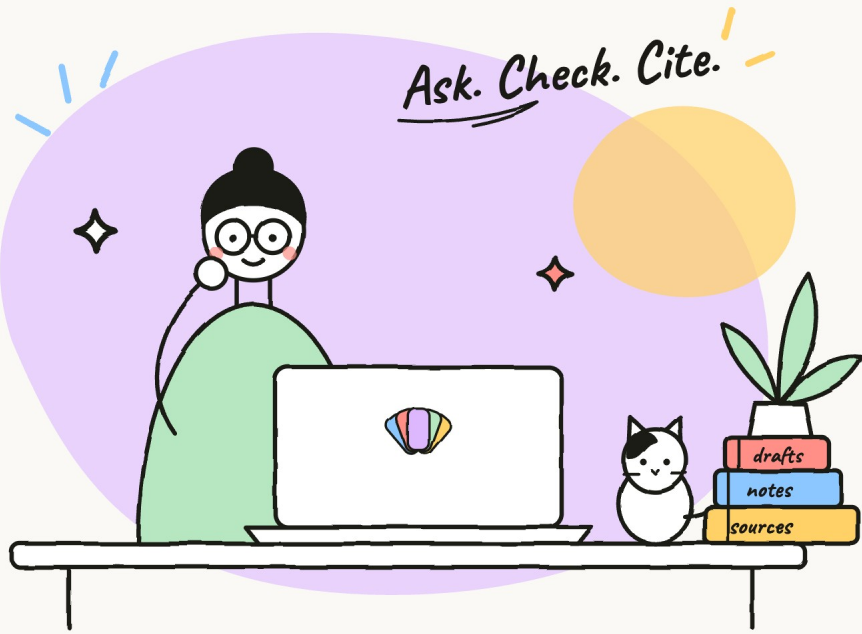

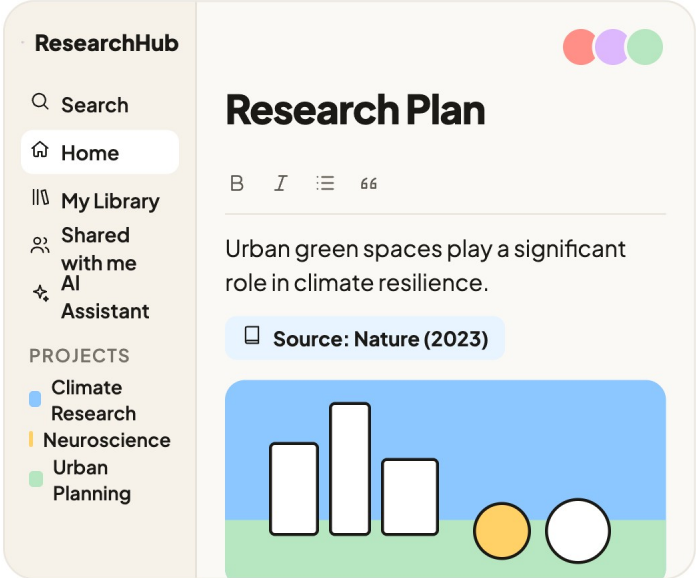

Illustration style

Hand-drawn, expressive, and clean. Friendly, curious, and intelligent — made for researchers, by researchers.

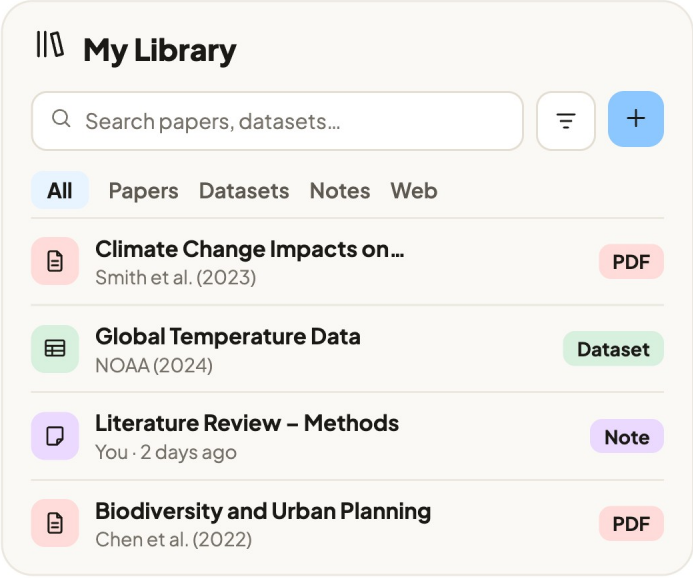

UI fragments

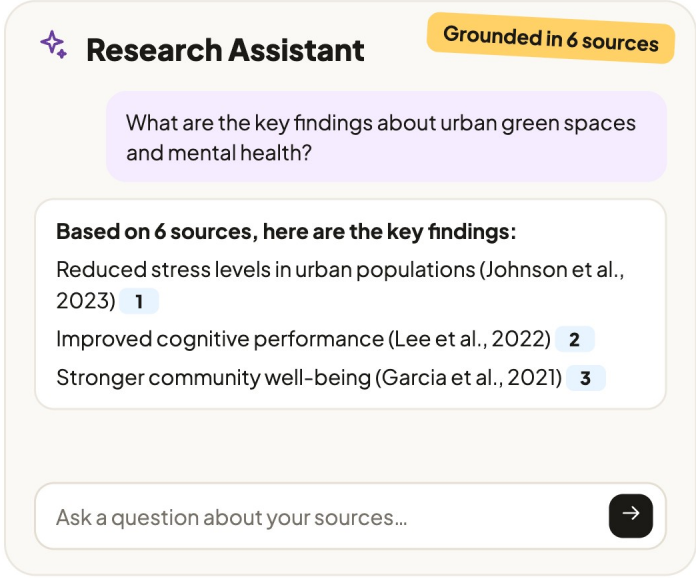

Explorations of key interface areas and visual treatments.

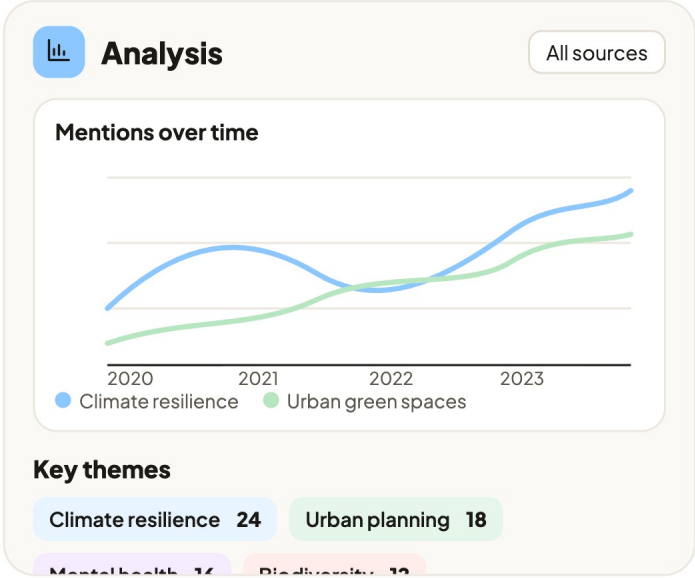

Research workspace
Calm, focused writing and ideation space.

Source library
Organize and work with all your materials.

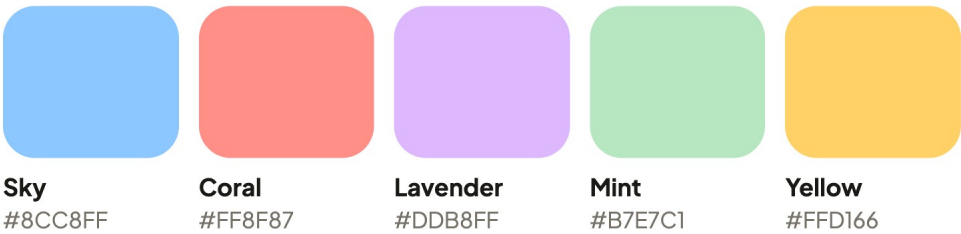

AI assistant (grounded in sources)
Insights, summaries, and analysis with citations.

Analysis & insights
Visualize and explore your research.

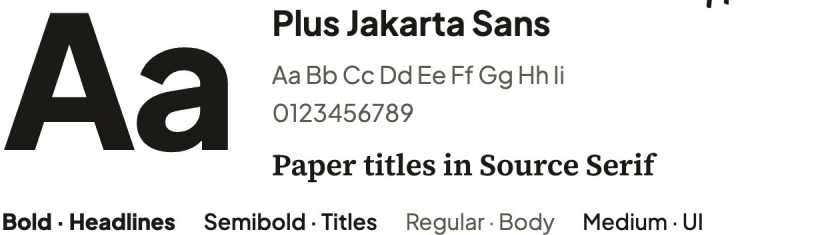

Color palette

Soft, modern, and optimistic. Inspired by science, creativity, and calm focus.

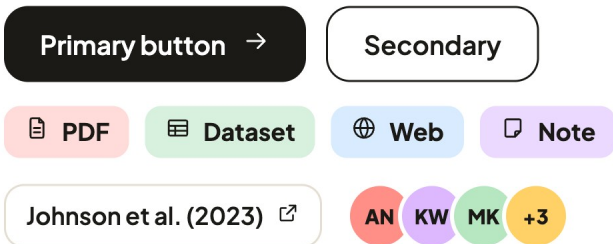

Typography

Confident headlines with friendly, readable text.

Components

Core UI elements and styles.

Design tokens

Warm off-white ground, near-black ink, five balanced accents. Accents tint, border and mark — they are never body-text colors.

Information architecture

One workspace holds sources, documents, analyses and conversations. AI appears inside each of them — never as a separate world.

How it scales

Layout rules that keep the product usable as a workspace grows.

- 3 sources

Cards, generous rows. Empty-ish library shows the upload zone inline.
- 30 sources

Dense list, type tabs, status filter. Ask scope defaults to all, selection is one click.
- 300 sources

Virtualized list, saved filters, folders as chips. Citation popovers stay one source wide.
- 1 member

No presence UI. Members screen leads with the invite form.
- 5 members

Avatar stack collapses to +N; presence colors map to member color.
- Many docs

Outline + list pinned left; recent first; archived hidden behind a chip.

Illustration kit

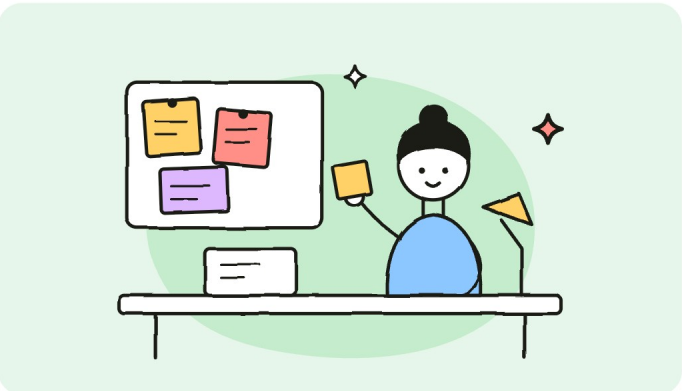

Black line art with a slight hand wobble, flat pastel fills from the five brand colors, simple separated objects. Each scene is built from layers so it can later be animated.

2.6 px ink line no textures

Character language

Varied hair, face shapes, glasses and posture — original, never a copy of a reference. Faces stay minimal: two dots and a line.

Built to animate

Every object is a separate layer. Motion is short, one-shot and never looping for long.

Character blink	Eyes scale-Y to 0.1 for 120 ms, every 5–7 s.
Floating paper	Rises 6 px and tilts 3° over 2.4 s, once on arrival.
Highlight	Wipes left to right over 400 ms when evidence is found.
