ANSWER BLOCK · EVIDENCE ITEM

SUMMARY

The largest deviation occurred at low frequencies ¹ ³, where the current drops below the meter's resolution.

measurements.xlsx · measurement_01 · rows 14–28

Used for: “The deviation increased below 200 Hz.”

Uncertainty.

No calibration record exists for the second multimeter.

2. Theoretical Background

Photovoltaic efficiency decreases as temperature increases. ¹ The open-circuit voltage falls by roughly 2.2 mV per kelvin.

AI generated · edited by Adam

T (°C)	Voc (V)	Isc (mA)	η (%)
25	0.612	34.8	19.4
45	0.566	35.4	17.8
65	0.520	36.1	16.2

“The temperature coefficient is the single most useful number to report.”
